# The LEADING Cephalosporin

## Ceftrum-250/500/1000

Ceftriaxone-250/500/1000mg

- O.D. administration allows simplification of complex regimens in Hospital setting
- Prevails for longer duration as it penetrates quickly
- Pre-operative prophylaxis covers the entire pre-operative period of risk
- No dose repetition required for prolonged surgeries
- 'Superior than sulbactam & clavulanic combination

## SURGICAL INFECTIONS
## GYNAECOLOGICAL INFECTIONS
## URINARY TRACT INFECTIONS
## BONE & JOINT INFECTIONS

**Sulbactam works in synergy with Ceftriaxone**
**addition of Sulbactam improves not just susceptibility patterns...**
**but also adds to the spectrum**

## Ceftrum-S 1.5gm

Ceftriaxone-1000mg + Sulbactam-500mg
